

Multiplication problem solving.

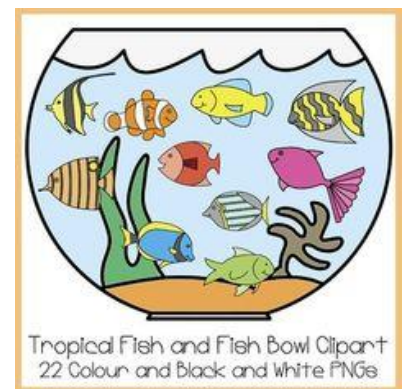

You can draw the problems to help you.

Make sure you write your multiplication number sentence.

1. There are 5 sausages in a pan.
How many sausages in 6 pans?

2. There are 10 fish in a tank.
How many fish in 5 tanks?

3. There are 12 pairs of wellies.
How many wellies altogether?

4. Each plate has 5 cakes on it.
How many cakes on 8 plates?

5. *There are 10 flowers in a bunch.
How many flowers would there
be in 7 bunches?*

Extra challenge.

Tash and Jane have equal groups of
either 2, 5 or 10.

Jane has 5 equal groups.

Tash has 3 equal groups.

Tash's total is more than Jane's total.

Each of their totals is less than 40.

What could they be counting in?

What could their totals be?

How many will be in each group?

Use equipment to help you.
