pencils of each colour.

60p.

2 purses.

p in each purse.

12 cakes.

4 boxes.

cakes in each box.

Problem Solving.

Each child has the same amount of sweets. The amount of sweets they have is less than 20.

They share the sweets equally in different ways. Can you work out how many they had to begin with?

Max

I share my sweets
between two bags and
have none left over.

I share my sweets
between five bags and
have one left over.

Lexi

Robin

I share my sweets
between ten bags and
have 6 left over
