

Year 1 – Add by making 10 Problem Solving – Harder

Add by Making 10

7a. Choose a digit card to complete the number sentences below. You can use the digit card more than one.

$$\text{eight} + \square + \square = 17$$

$$\text{six} + \square + \square = \text{twelve}$$

PS

Add by Making 10

7b. Choose a digit card to complete the number sentences below. You can use the digit card more than one.

$$\text{two} + \square + \square = \text{eleven}$$

$$9 + \square + \square = \text{sixteen}$$

PS

8a. Hardin has used a part-whole model to calculate $8 + \text{seven}$ by making 10.

Is he correct? Explain why.

R

8b. Freya has used a part-whole model to calculate $\text{five} + 9$ by making 10.

Is she correct? Explain why.

R

9a. Belle is solving $4 + 8$.

I need to add six to make ten and then I add four.
So $4 + 8 = 14$.

Find and correct her errors. Explain your reasoning.

R

9b. Tariq is solving $6 + 7$.

I need to add four to make ten and then I add five.
So $6 + 7 = 15$.

Find and correct his errors. Explain your reasoning.
