

1a. Use your knowledge of dividing 2-digits by 10 to find the odd one out.

	tens	ones	•	tenths	hundredths
A		●	•	● ●	
B		● ●	•	●	
C	●	● ●	•	●	

Explain your reasoning.

R

1b. Use your knowledge of dividing 2-digits by 10 to find the odd one out.

	tens	ones	•	tenths	hundredths
A		●	•	● ●	
B		● ●	•	●	
C	● ●	●	•	●	

Explain your reasoning.

R

2a. Add the counters to the place value grid to complete the number sentence.

tens	ones	•	tenths	hundredths
		•		

$\div 10 = 5.2$

PS

2b. Add the counters to the place value grid to complete the number sentence.

tens	ones	•	tenths	hundredths
		•		

$\div 10 = 4.3$

PS

3a. Freya has divided 24 by 10 in the place value grid below.

tens	ones	•	tenths	hundredths
● ●		•	● ●	
		•	● ●	

Is she correct? Convince me.

R

3b. Oscar has divided 32 by 10 in the place value grid below.

tens	ones	•	tenths	hundredths
	● ●	•	● ●	
	●	•		

Is he correct? Convince me.
