

# Volcano Labelling Activity Answers

Using the word bank, can you label the key features of the volcano?

## Word Bank

<b>ash cloud</b> The cloud of ash formed above the volcano from the force of the volcanic explosion. The ash can drift in the sky and fall back to earth.	<b>secondary vent</b> Another vent through which the magma and other rocks and gases can flow out.	<b>magma chamber</b> A pool of magma beneath the volcano.	<b>main vent</b> The main vent is the primary opening of the volcano through which the magma and other rocks and gases flow out.
<b>lava flow</b> After erupting, some of the hot lava will flow down the sides of the volcano.	<b>layers of rock</b> The earth's crust is made of several layers of rock.	<b>conduit</b> The underground passage through which the magma flows from the chamber towards the vent.	<b>crater</b> The crater is the mouth of the volcano which surrounds the vent.
